

# Samiullah Mohammadi

## Full-Stack Web Developer & Database Instructor

Kunduz, Afghanistan · samimohammadi@aol.com · github.com/callmearab · linkedin.com/in/samimuhammadi

---

### SUMMARY

---

Self-taught software developer, educator, and youth-organization leader from Kunduz, Afghanistan. Currently managing two professional technical roles — database architecture/instruction and web development instruction — while leading four volunteer organizations and completing advanced international coursework, all while still a teenager. Combines hands-on full-stack development and database-architecture depth with demonstrated leadership impact, driven by a commitment to expanding access to technology and education across underserved communities.

### PROFESSIONAL EXPERIENCE

---

#### Database Developer — PEC

Afghanistan | Mar 2026 – Aug 2026

- Sole database architect for a growing academy — design and maintain CRUD systems and RDBMS infrastructures from the ground up.
- Teach MySQL, SQL, DBMS, and RDBMS to 23 university students, delivering 10 instructional hours per week (100+ hours since March 2026).
- Manage PEC's production database environment, ensuring data integrity, performance, and reliability.
- Introduced structured database naming conventions and optimized query performance, reducing common retrieval bottlenecks.

#### Freelancer — Upwork / Self-Employed

Remote | 2025 – Present

- Deliver web development instruction and technical consulting to clients worldwide through the Upwork platform.
- Independently manage freelance projects end-to-end, spanning database architecture and full-stack web development.
- Provide project management, curriculum design, and technical consulting services as a self-employed developer.

#### Web Course Instructor for University Students — Kunduz University

2024 – Present

- Delivering web development courses to fellow students at Kunduz University.

### LEADERSHIP & VOLUNTEERING

---

#### Regional Ambassador — International Computer Science Challenge (ICSC)

Kunduz | Aug 2025 – Present

- Represent ICSC across Kunduz province, coordinating student recruitment, coaching, and competition preparation.

#### Junior Ambassador — University of the People (UoPeople)

Remote | Mar 2025 – Present

- Guide Afghan youth through tuition-free, U.S.-accredited university admissions pathways.

#### Program Manager — General Manager — Future Bridge NPO

Remote | Dec 2024 – Present

- Oversee strategic planning, team coordination, and program execution for a youth-focused education non-profit.

#### Head of Opportunities Department — Youth for Youth

Remote | Dec 2024 – Present

- Lead sourcing, vetting, and distribution of scholarship, internship, and training opportunities for Afghan youth.

#### Administrative Assistant — Environment Protection of Afghanistan

Kunduz | Oct 2023 – Present

- Planned and facilitated environmental awareness seminars and workshops across schools in Kunduz.

EDUCATION

---

**B.Sc. in Computer Science (Information Technology) — Kunduz University**

2024 – 2028 | *Currently Enrolled* | GPA 3.7 / 4.0

**High School Diploma — Top of Class — Mawlawi Sarajudin Boys High School**

Kunduz, Afghanistan | *Apr 2021 – Jan 2024*

- Graduated with the highest overall grade in the school two consecutive years (Grade 11 & Grade 12).
- Formally recognized as Best Student of the Year by school administration (2023).

SELECTED PROJECTS

---

**Future Bridge Official Website — futurebridgeif.org**

*Sep – Dec 2025*

- Sole developer — designed and shipped a fully responsive website (HTML5, CSS3, JavaScript, Font Awesome, Tailwind CSS) serving hundreds of Afghan youth.

**Smart with AI Conference — smartwithai.vercel.app**

- Built the front end for a 5-week AI-literacy conference registration site (HTML, CSS, JavaScript, Font Awesome, Tailwind CSS) and connected registration data handling with a PHP backend and Redis for caching.

**RusPath Exam — ruspath.vercel.app**

- A second-round exam simulator for the Russian “Open Doors” scholarship, built with React, Tailwind CSS, Hugelcons, and Google Apps Script for the question bank.

**KZ Interview Prep — kztest.vercel.app**

- A university-interview practice platform for Kazakhstan scholarship candidates with flashcards and mock interviews, built with React, Tailwind CSS, Hugelcons, and Google Apps Script.
